

TrustChain Systems Kft. plans to revolutionize company identification. Not data validation itself, but the way people think about it, which makes people realize how important safety is. Transparent Data understood our mission great and has been able to support us with Czech Republic Business Register API that we needed. Maintaining not only high quality of data our products demand, but also short deadlines and agile support. In such a type of cooperation we trust.

They are a great partner to work with and we are pleased that Transparent Data helps us build one of the biggest success stories in the CEE region.

Gergely Romhány, CEO, TrustChain Systems Kft.
